

Budan

HIGH EFFICIENCY EASY OPERATION

Budan M200

At the peak time of the day, how to quickly provide customers with a cup of good coffee that they like? The powerful performance of M200 is enough to deal with commercial occasions. The robust brewing unit provides stable pressure control and brings better coffee flavor. Dual thermoblocks and dual pumps can make milk and coffee, hot water and coffee simultaneously. Equipped with a 10 inch color touch screen, the operation is extremely convenient, and over 20 drinks are available for you to choose. With brand new design, the overall appearance is elegant and atmospheric. The lockable bean hopper with clever seal design retains the best flavor of coffee and is easy to remove for maintenance.

Features

Fashionable design, elegant device

Fashionable exterior design, with metal elements in the front view, highlight the high-end atmosphere.

High efficient coffee dispense system

With dual pumps and electromagnetic valve control system, coffee and water, coffee and milk can come out simultaneously at your disposal.

Guarantee every cup of Espresso quality

Accurate tamping process & stable pressure control system guarantee high quality espresso for every cup.

Milk system self-cleaning

During automatic cleaning, the milk tube is automatically closed to avoid cleaning water pouring into the milk container.

Intelligent self-adjustment milk system

Milk monitoring NTC automatically adjusts the milk volume according to the milk temperature.

10" colorful Android touchscreen screen, easy to operate

10" Android touchscreen is simple to operate with 20+ coffee selections. Excellent coffee enjoyment at one touch of screen. More applications are available with Android system.

Coffee Residue-free

Enjoy fresh coffees cup after cup with the residue-free technology thanks to the drainage pump, which guarantees no coffee residues before or after making coffee.

Diverse water supply mode

With water tank, water barrel, and tap water connection, it can match various application scenarios.
